

# Exposing Chemtrails: Contrails vs Chemtrails

WRITTEN BY  
Jeff Pattison

**M**y name is Jeff Pattison. I have been privileged to serve in the Montana legislature, representing citizens who trusted me with a mandate to watch over and advocate for their values. While serving on Appropriations and also Chairing the Audit Committee, my background in the ag business and agriculture production gave me a common-sense perspective that not everything was as it appeared. Hopefully, the reality of what I'm disclosing will be the truth that sets you free from the deception being promulgated by ministers of deception.

**Fact:** Weather manipulation poison chemtrails are indeed real and verified by our government.

**Fact:** Contrails are water vapor and carbon dioxide exhaust that form ice crystals in cold air around 30,000 feet, and that smoke never lasts more than a minute and then dissolves and finally disappears.

**Fact:** "There is a huge amount of aluminum, strontium, barium, and manganese in the poison sprays in chemtrails. Aluminum is common in a bonded form not in a free form and is being found at high rates which is not natural in soil samples". (Iraja Sivasdas member, union of Concerned Scientists)

**Fact:** A rouge country could take planet-hacking into its own hands to alter the climate, thus potentially leading to war. Geoengineering spraying sulfuric acid and aluminum is being used to reverse the "effects of global warming or climate change" through stratospheric aerosol injection. (John Brennan Former CIA Director, speaking at the Council of Foreign Relations Summit)

There are so many websites like **GeoengineeringWatch.org** for example that have done far more research than I have. As a Farmer Rancher, I have the privilege to spend a greater portion of my time outdoors enabling me to view the sky. I see as does anyone looking up at the white clouds left behind planes high above. Crisscross patterns that seem to linger all day instead of disappearing like true contrails would. With 15 states legislating policy with 25 different bills I would argue I'm not the only one who believes there is an agenda to manipulate the weather and dare I say humankind as well. There have been reports and confirmations of parasites being expelled from ariel spraying.

Weather modification is not new or recent, however it has become emboldened in its advancement for other than noble purposes. I started on a quest of whys and how comes back in 1996 after reading "ANGELS DON'T PLAY THIS HAARP" Advances in Tesla Technology; a book by Jeane Manning and Dr. Nick Begich. Our government admits it has been using nefarious technology for years as black ops and manipulations for military and social purposes. Reports in the thousands confirm what we all have been witnessing but finding hard to believe. Could our government be controlling the weather for purposes beyond what they claim is good? Creating snow that doesn't readily melt for skiing is a good thing, right? Moving hailstorms, tornados, and torrential rainstorms to move and manipulate people to move or even be removed for financial goals is noble right?

Whistleblowers have warned Pentagon generals as far back as 1984 about the dangers of high-energy physics and when presented with scientific findings, refused to respond.

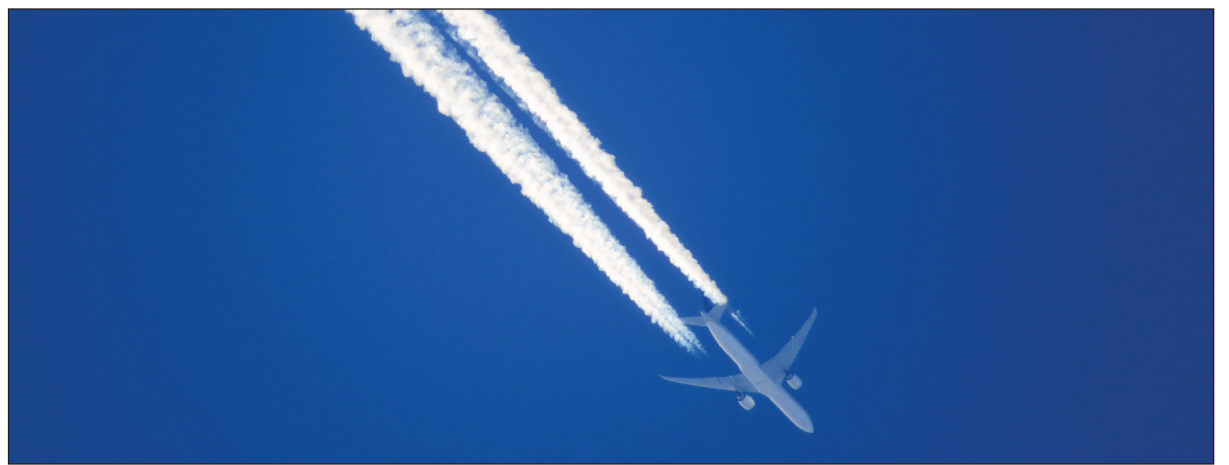

The poisons being purposely flushed into our clean skies are not healthy.

Question / Why have companies cloned unique genes for barley, wheat, and sorghum that are being used to develop lines that can withstand toxic levels of aluminum in the soil?

What effects are these poison chemtrails being used to manipulate other than plants? Is wildlife, or even worse humankind being adversely and covertly affected?

This, is from Advances in Social Sciences Research Journal – Vol. 8, No. 7 Publication Date: July 25, 2021 that was disregarded by the United Nations and our Nation equally well:

Humans are not the only life form adversely affected by jet-emplaced chemtrails. Plants, trees and indeed whole forests are harmed

by chemtrails in three main ways. Plants and trees are damaged by chemtrail-caused drought and poisoned by the chemically mobile aluminum added to atmospheric water. They are also damaged by the increased levels of harmful solar ultraviolet radiation caused by chemtrail destruction of ozone, which shields life against dangerous ultraviolet radiation. Orchards and agricultural plants are affected similarly. Atmospheric manipulation that utilizes aerosolized coal fly ash is a primary factor in the extent and severity of forest fires in California and elsewhere; other adverse effects include exacerbation of drought, tree and vegetation desiccation and die-off, and the unnatural heating of Earth's atmosphere and surface regions. Forest combustibility is increased by moisture-absorbing aerosolized particles that damage the waxy coatings of leaves and needles, reducing their tolerance to drought. The aerosolized coal-fly-ash-chemtrail climate manipulation greatly increases the potential for forest fire ignition by lightening. Wildfires dramatically worsen baseline air pollution, emitting harmful gases and volatile organic compounds, and they both concentrate and re-emit toxic elements and radioactive nuclides over wide areas. The type of air pollution created by wildfires is associated with increased all-cause mortality worldwide, with the greatest impact on respiratory and cardiovascular disease.

Wildlife species are suffering a precipitous global decline. Aerosolized chemtrails are a significant factor in the catastrophic global decline in the populations of insects, birds, and bats. Insects can ingest and/or accumulate toxic ash on their body surfaces which then birds and insectivorous bats consume. Chemtrails disrupt the natural environment, modify habitats, and adversely affect the natural life cycles, upsetting the complex and delicate balance that makes life possible on Earth. Even marine environments are affected; for example, chemtrails cause shifts in the global plankton community balance in favor of harmful algae and cyanobacterial blooms in fresh and saltwater. And corals are harmed by increased levels of solar ultraviolet radiation. As we discovered the multiple, ramifying consequences of chemtrail ash on the environment, and on human and environmental health, one nagging question remained: Why? Why was the spraying occurring, occurring worldwide without let-up, year after year? Humans are opportunistic creatures. For example, many, lacking a moral compass, might capitalize on the consequences of the chemtrail assault on the environment by acquiring farmland from farmers whose crops were ruined by chemtrails, or real estate destroyed by rampant forest fires. These are merely examples of consequences, not their cause. Why would supposedly civilized people keep silent and allow the wholesale destruction of human and environmental health? Why is this happening? What is the supposedly legal basis? And, what entities are responsible? The aerial chemtrail assault with all its secrecy and disinformation now began to make perverse sense: It is a form of environmental warfare, seemingly waged on behalf of a future globalized United Kingdom civilization, a new civilization to be born of the ashes of a new form of world war. We discovered the clever, but deceitful and deceptive 1978 United Nations ENMOD Treaty, a Trojan horse legal agreement designed to cause sovereign nations to wage covert environmental warfare against their own citizens and against citizens of other sovereign nations. The true nature of this United Nations ENMOD sanctioned activity, we allege, is the conduct of covert environmental warfare against established nation states, including Western states, their citizens and their culture in favor of a supranational, global regulatory regime whose oversight will encompass a fully globalized economy dominated by multinational mega-corporations.

Ahhh now the core of it all starts to come to light. ENMOD's purpose is to subvert the authority of individual nation states.

What other evidence points to direct United Nations involvement? For nearly four decades, the United Nations through its Intergovernmental Panel on Climate Change has been extracting vast sums of money from wealthy nations to promote the idea that climate change – global warming – is caused by anthropogenic fossil-fuel-produced carbon dioxide. The goal seems to be to control or shut down fossil fuel use in favor of renewable energy sources to ameliorate global warming. Yet through its ENMOD treaty the United Nations has simultaneously sanctioned secret activities that in fact cause global warming. This must be one of the greatest scientific frauds ever perpetrated. Could this also be a factor in the push for wind turbines and solar panels with the mystery of finding the truth as to the economic and environmental involvement of a New World Order?

Unless and until politicians, news media, scientists, and others in our society face the truth of what is happening before their very eyes and collectively demand a halt to these covert technological activities, we will continue to charge full speed ahead into the first anthropogenic-caused mass extinction. People throughout the world are in dire need of means to protect themselves and their families – and indeed, all life on Earth – from ruthless transnational technological assault. The well-being and very existence of humanity is at stake. In Montana and the United States our personal freedoms and properties are protected from government excesses by the Bill of Rights, but Americans and other members of the world community are not protected against multi-dimensional, transnational technological excesses. In both Montana and the United States we desperately need a set of new Constitutional Amendments that collectively form a second Bill of Rights, a Technology Bill of Rights, to enhance our freedoms, and our right to clean air, water, soil/agriculture/food, and to protect the planetary environment from deliberate perversion and alteration via large-scale environmental modification or geoengineering. Such a new Technology Bill of Rights could serve as a model for other sovereign nations.

However, we have a bill that has passed on to the next chamber. Sen Bob Phalen has SB 473 which deals with weather modification specifically aerial spraying of poisons. I personally would like to see penalties and placement of this in the hands of the Public Service Commission to oversee. I plan to be an advocate for the seat that will be opened up due to term limits that Commissioner Randal Pinocci from District 1 currently serves, and as such feel Qualified to watch over this issue as well as the other oversights that would come before me.

So, to summarize deception or fact. I feel confident in presenting information that doesn't fit the "mainstream media narrative" and as such will be put up as a fear-monger but I'm confident that you the reader will judge for yourself and seek out the facts, not the narrative that exists.

I am not nor want to be judged as in Matthew 7: 1-2 "Do not judge, or you too will be judged, I do know that nuts don't grow on Cherry trees. So in that same book, same chapter same speaker: <sup>15</sup>"Watch out for false prophets. They come to you in sheep's clothing, but inwardly they are ferocious wolves. <sup>16</sup>By their fruit you will recognize them. Do people pick grapes from thornbushes, or figs from thistles? <sup>17</sup>Likewise, every good tree bears good fruit, but a bad tree bears bad fruit. <sup>18</sup>A good tree cannot bear bad fruit, and a bad tree cannot bear good fruit. <sup>19</sup>Every tree that does not bear good fruit is cut down and thrown into the fire. <sup>20</sup>Thus, by their fruit you will recognize them. If anyone is in doubt all we need to do is step outside and look up.

Just saying. 🍌
