

Tactical Civics[™] is a Solution for Montana and America!

WRITTEN BY **Dave Zuniga**

ven if Trump can improve things in DC, ■ We The People ourselves need to curb and arrest corruption in school district, city, and county operations. As the collective sovereign, it's our authority and our duty!

Only one full-spectrum, lawful, peaceful, coast to coast organization exists for that very purpose; the proudly Christian organization called Tactical Civics™. With over 1,630 county chapters in all 50 states, it launched after almost 80,000 hours of R&D, to bring our servants in government back under the control of We The People.

First, the county chapter educates citizens to recognize their power to investigate crime, by impaneling Grand Juries as needed. The proposed County Grand Jury Ordinance will have county government do what 26 California counties already do: add a dedicated web page for citizens to volunteer for Grand Jury and report potential crimes in our county. Its book 'Grand Jury Awake' is a briefing manual for every Grand Jury, and 'The People's Panel' describes the 300-year history of Grand Jury success in America.

Each county chapter also works to pass a County Militia Ordinance committing county government to lawfully fulfill the constitutional duty that the State has refused to perform. As David Zuniga, the organization's founder, explains, "The so-called 'militia movement' is not the Militia we stipulate in the Constitution, but a 70-year-old private firearms hobby network that has stigmatized the word. Tactical Civics[™] is not a militia group; chapters teach civics and help restore constitutional Militia. We The People put it in the Constitution; Militia is required by law. Our federal and state servants will not stop violating the law on their own, but once a responsible remnant of the People restore our Grand Juries and Militias and a critical mass of other citizens see the value of restored American civics, we think our

state legislature will see the writing on the wall".

Tactical Civics[™] has a national project called Our First Right, to complete the ratification by the states of the original first Article in the original Bill of Rights, requiring congressional districts to not exceed 50,000 people. Already ratified by 11 state legislatures, when ratified by 27 more, it will give America's 31,000 small towns their first representation in the U.S. House and Electoral College in more than a century.

Explains Zuniga. "The corrupt, immoral big cities will no longer control American elections. Small districts, as George Washington suggested, will reduce corruption. Serving in the U.S. House will become attractive to normal Americans to run affordable campaigns and serve as statesmen, not career lap-dogs of industry and globalists".

But reducing districts to 50,000 people will mean 6,800 congressmen. Since the Capitol building and office buildings in DC will not accommodate them, the group plans to work with that large new cohort of candidates to pass its 'Bring Congress Home Act', creating the world's first distributed legislature. Congress will meet by Internet as they often did during the so-called 'pandemic', each member working from one modest office in their own district, under the watchful eye of the People, rather than under the thumb of lobbyists. "This isn't

rocket science", Zuniga explains. "Members of Congress will no longer abandon their families only to be corrupted by DC organized crime. And both House and Senate will be limited to two terms of office."

The organization is building an Artificial Intelligence mobile app, the Indictment Engine[™], to investigate school district, city, and county operations, and to scan every proposed state and federal bill when filed. If it violates the Constitution or state law, the app generates the appropriate felony presentment(s) and transmits them to those counties' Tactical Civics™ chapters to call for a Grand Jury in each co-sponsor's jurisdiction. Grand Juries would warn each target to withdraw the bill or face indictment.

Beyond its action projects, the organization has 18 other major reform laws for statesmen to pass over the long term in the Trump era: end the FED's counterfeiting scheme, defund and mothball unconstitutional agencies and regulations, end DC's subsidizing tyrants and plundering foreign countries, truly securing our borders, and more.

The organization's online training center offers fellowship, daily prayer, Zoom classes for its major books, planning and reporting on new introductory seminars being held (at least 60 per month across the republic) and a large library of books, podcasts, videos, blog articles and more at https://www.tacticalcivics.com/. Zuniga is quick to clarify, "While Trump works DC, We The People restore America. Tactical Civics[™] is a way of life for the responsible few, finally enforcing our rule of law. Unlike politics, Tactical Civics™ needs only half of 1% of the People to take responsibility. You learn what we weren't taught in school. We turn off the circus of politics and together, we save our civilization by the grace of God."
